Hi John, here are some documents I was able to locate that should be helpful.

Toni or Stef, do we have a complete up to date test protocol for the SRI testing, that incorporates the responses that they gave us to our comments. The most recent test plan that I can locate is dated 9-27-2013, and then we have information they gave us dated 4-14-14.

Do you have anything more recent, or anything else that would help John and I as we prepare to observe the test at the Cealus facility (formerly Pioneer) located in the Oooguruk oil and gas development area.

Do you have any recommended things that you are aware of that would be good for us to pay closer attention to?

Thanks!!
